

**Drive Your Future**

# Girls Night Out and Life is a Highway

STEM workshops for grades 6 through 8

Rev up your excitement for the **Girls Night Out** and **Life is a Highway** workshops!

Geared for students in grades 6 through 8, these dynamic events offer students a thrilling dive into the world of automotives and mobility. Students and their parents/guardians will participate in engaging hands-on learning activities, including building an electric Kidder car.

#### Why join:

- Take part in fun and engaging STEM-focused learning activities
- Foster an interest and enthusiasm for STEM and automotive technology
- Learn more about future career paths in the automotive field

This after-school program aims to drive students to explore the world of STEM and automotive technology, inspiring future educational and career pathways. The learning continues after the program—parents/guardians are given a STEM playbook full of activities and information to take home, while students get to keep the Kidder car they built.
