

MCIU presents our "Young Innovators Panel"

Saturday, May 25, 2024,
11am-12:30pm

Do you want to learn how to solve problems creatively?
At this hands-on workshop you will participate in how to use
design thinking!

You will also hear how a group of students at McMaster University used
this model to create a solution for more than 50,000 people,
designing a way for them to learn and stay
up-to-date with technology changes.
